

Allure Test Report - 6/3/2026

Repository: <https://github.com/BrianGator/DTCC-Selenium-Cucumber-Automation/>

Website Under Test: <https://www.dtcc.com/>

Owner: Brian McCarthy

Overview

Metric	Value	Meaning
Total detailed tests	82+	Allure suite combines UI, API, database, reporting UI, quality gates, and optional failure demos.
Stable pass gate	At least 85%	Quality gate test verifies stable release-readiness threshold.
Intentional failures	Opt-in only	Enable only with includeIntentionalFailures=true to populate failure examples.

Allure Tab Data Summary

Allure Tab	Fields to Review	Expected Data
Overview	Launch summary, trend, categories, suites, environment, executor.	Run metadata, repository, website, profile, Chrome headless, Java 17, Maven.
Categories	Defect categories and failure groupings.	Intentional demo failures, security validation failures, API contract failures, browser UI failures, skipped demos.
Suites	Test classes and individual test methods.	AllureEnabledUiReportTest, DtccPublicAllureShowcaseTest, DtccExtendedAllureCoverageTest, DtccAdditionalAllureCoverageTest, UI/API/DB tests.
Graphs	Trend, status, duration, severity, categories.	History is restored from gh-pages and seeded when no prior history exists.
Timeline	Test execution timing.	UI, API, DB, and report UI tests grouped by execution time.

Behaviors	Epic, feature, story hierarchy.	DTCC public website, backend API, database validation, quality gates, intentional failures.
Packages	Java package view.	com.dtcc.automation.reports, api, database, ui, selenide, publicsite.

Quality Gates

Gate	Target	Status
Stable pass rate	Greater than or equal to 85%	Expected pass
Blocker defects	0	Expected pass
Global metadata	Present	Environment, executor, repository, website, owner.
Intentional UI/API/DB defects	Opt-in	Skipped unless enabled.

DTCC Website Areas

Area	Report Evidence
Home	Branding, public URL, page body, navigation.
Client Center	Documentation, support links, downloads, contacts, onboarding.
Important Notices	Notice search, filters, date sorting, PDF links.
Products and Services	Product/service taxonomy and internal links.
Legal and Regulatory	Compliance pages, terms, public regulatory references.
Global Trade Repository	Dynamic tables, filtering, sorting, pagination, synchronization.
PDF Library	Download status, content type, naming, text validation plan.
