

DTCC Selenium Cucumber Automation
Test Report Dashboard
Generated from the public GitHub Pages report content.

Report URL: <https://briangator.github.io/DTCC-Selenium-Cucumber-Automation/>
Repository: <https://github.com/BrianGator/DTCC-Selenium-Cucumber-Automation>
Workflow: Selenium CI/CD Pipeline with Allure Reports

Verified Result Totals

- Verified Stable Tests: 11
- Verified Passed: 10
- Verified Failed: 0
- Verified Errors: 0
- Verified Skipped: 1
- Catalog Scenarios: 48

Verified Suite Summary

- allure-ui: PASS - 6 tests, 5 passed, 0 failed, 0 errors, 1 skipped
- api: PASS - 1 test, 1 passed, 0 failed, 0 errors
- selenide: PASS - 4 tests, 4 passed, 0 failed, 0 errors

Public Safety

This report uses local mock UI, WireMock API services, H2 database checks, and no private DTCC systems, credentials, or internal URLs.

Expanded Test Catalog - Verified and Reported Coverage

- 01 PASS Allure UI - Annotated order flow with screenshots and attachments
- 02 PASS Selenium UI - Valid demo login succeeds in headless Chrome
- 03 PASS Selenium UI - Order lifecycle completes in the mock app
- 04 PASS API - Mock transaction API returns expected account payload
- 05 PASS Database - H2 schema and transaction count validate
- 06 SKIP Guardrail - Intentional failure demo disabled by default
- 07 PASS Selenide UI - Mock login page opens and accepts credentials
- 08 PASS Selenide UI - Product search/filter controls visible and usable
- 09 PASS Selenide UI - Cart summary updates after adding item
- 10 PASS Selenide UI - Checkout confirmation state renders correctly
- 11 PASS API - Backend transaction happy path validates status and body
- 12 PASS Compile - Main source compiles with Java 17
- 13 PASS Compile - Test source compiles with Java 17
- 14 PASS Allure - Raw Allure results directory generated
- 15 PASS Allure - Allure HTML report index generated
- 16 PASS Dashboard - GitHub Pages portal index generation
- 17 PASS Artifact - Raw Surefire reports uploaded by workflow
- 18 PASS Artifact - Allure HTML report uploaded by workflow
- 19 PASS Artifact - Report portal artifact uploaded by workflow
- 20 READY UI Login - Invalid credentials show login error
- 21 READY UI Login - Blank username/password validation
- 22 READY UI Login - Keyboard submit from password field
- 23 READY UI Accessibility - Username field accessible label
- 24 READY UI Accessibility - Password field accessible label
- 25 READY UI Accessibility - Error message announced after invalid login

Expanded Test Catalog - Additional Ready/Optional Scenarios

- 26 READY UI Cart - Add first product to cart
- 27 READY UI Cart - Add multiple products to cart
- 28 READY UI Cart - Remove product from cart
- 29 READY UI Cart - Cart total recalculates after quantity change
- 30 READY UI Checkout - Shipping form accepts public-safe address
- 31 READY UI Checkout - Required shipping fields validate correctly
- 32 READY UI Checkout - Payment method selection persists through review
- 33 READY UI Checkout - Order confirmation number is displayed
- 34 READY API Negative - Missing transaction id returns validation error
- 35 READY API Negative - Unknown account returns not found payload
- 36 READY API Contract - Transaction response schema validation
- 37 READY API Contract - Error response schema validation
- 38 READY Database - Insert sample transaction row
- 39 READY Database - Update sample transaction status
- 40 READY Database - Delete sample transaction row
- 41 READY Cucumber BDD - Login, checkout, confirmation scenario
- 42 READY Cucumber BDD - Invalid login access denied scenario
- 43 READY Cucumber BDD - Order API transaction status scenario
- 44 READY Public Site - Public demo website smoke navigation
- 45 READY Public Site - Public demo website title/content validation
- 46 READY Report UI - Dashboard links point to Actions, repo, artifacts
- 47 READY Report UI - Allure report link resolves after Pages deployment
- 48 OPT-IN Failure Demo - Intentional failures only when enabled

Verification Commands

`mvn -B clean compile test-compile -DskipTests -> BUILD SUCCESS`

`mvn -B clean test -Dpallure-ui -Dbrowser=chrome -Dheadless=true -DincludeIntentionalFailures=false`

Result: BUILD SUCCESS; Tests run: 6, Failures: 0, Errors: 0, Skipped: 1

`mvn -B allure:report -> BUILD SUCCESS; target/site/allure-report/index.html generated`
