

# Allure Test Report - 6/3/2026

Generated report capture date: 6/3/2026. Source: public GitHub Pages dashboard and repository report artifacts.

## Allure Report Navigation Tabs

| Tab        | Displayed/covered data                                                                                                             |
|------------|------------------------------------------------------------------------------------------------------------------------------------|
| Overview   | Overall test case count, pass percentage, report time window, trend visualization, suites summary, environment, test case details. |
| Categories | Allure category navigation tab displayed in the report sidebar.                                                                    |
| Suites     | Suite grouping for API, Login, Selenium, Selenide, Cucumber, SQL Database, Security, Intentional Failure Demo.                     |
| Graphs     | Graph/trend section available from Allure sidebar.                                                                                 |
| Timeline   | Timeline tab available from Allure sidebar.                                                                                        |
| Behaviors  | Behaviors tab available from Allure sidebar.                                                                                       |
| Packages   | Packages tab available from Allure sidebar.                                                                                        |

## Overview Metrics

| Field                 | Value                                          |
|-----------------------|------------------------------------------------|
| Report title          | ALLURE REPORT 6/3/2026                         |
| Time window           | 5:06 PM - 5:21 PM (15m 13s)                    |
| Test cases            | 21                                             |
| Pass percentage shown | 76.19%                                         |
| Trend                 | Allure test trend chart displayed on dashboard |

## Suites - 9 Items Total

| Suite              | Passed | Failed | Skipped | Displayed result    |
|--------------------|--------|--------|---------|---------------------|
| API Tests          | 5      | 0      | 0       | 100% passed         |
| Login Tests        | 4      | 0      | 0       | 100% passed         |
| Selenium Tests     | 3      | 1      | 0       | 3 passed / 1 failed |
| Selenide Tests     | 3      | 0      | 0       | 100% passed         |
| Cucumber Tests     | 3      | 0      | 0       | 100% passed         |
| SQL Database Tests | 3      | 0      | 0       | 100% passed         |

| Suite                    | Passed | Failed | Skipped | Displayed result     |
|--------------------------|--------|--------|---------|----------------------|
| Security Tests           | 1      | 1      | 0       | 1 passed / 1 failed  |
| Intentional Failure Demo | 0      | 1      | 2       | 1 failed / 2 skipped |

## Environment Fields

| Field      | Value                                        |
|------------|----------------------------------------------|
| Browser    | Chrome Headless                              |
| Java       | JDK 17                                       |
| Build Tool | Maven                                        |
| Executor   | GitHub Actions / Jenkins compatible          |
| Base URL   | Public-safe mock app + dtcc.com public pages |

## Test Case Details

| Test                                         | Status | Purpose                                             |
|----------------------------------------------|--------|-----------------------------------------------------|
| validLoginShowsCataloguePanel                | PASSED | Selenide auto-wait login validation                 |
| validateTransactionLifecycleAndDatabaseState | PASSED | REST Assured + SQL persistence validation           |
| publicSiteShouldReturnCommonSecurityHeaders  | FAILED | Example defect: expected header not present         |
| intentionalApiContractFailureForReportDemo   | FAILED | Intentional sample failure for report demonstration |

## Passed Test Evidence

| Test                                                  | Evidence                                                                                                                                                              |
|-------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PASSED - validLoginShowsCataloguePanel                | Selenide opened the local mock app, submitted valid credentials, and auto-waited for the catalogue panel. Path: full-selenium-framework-from-scratch/selenide-wrapper |
| PASSED - validateTransactionLifecycleAndDatabaseState | REST Assured validated the mock API response, then the H2 database check confirmed the transaction row and status.                                                    |
| PASSED - publicSiteSmokeLoadsHomePage                 | Selenium/Selenide public-site smoke test confirmed page title/body rendering and public navigation availability.                                                      |

## Failed Test / Defect Evidence

| Failed test                                 | Defect type                                               | Expected                                             | Actual / Stack detail                                                                                                                   |
|---------------------------------------------|-----------------------------------------------------------|------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| publicSiteShouldReturnCommonSecurityHeaders | Security header expectation mismatch                      | Public response includes a required security header. | Header missing in sample response.<br>java.lang.AssertionError: Expected security header was not present at SecurityHeadersTest.java:42 |
| intentionalApiContractFailureForReportDemo  | Intentional API contract failure for report demonstration | JSON content type                                    | Received text/plain. This test is gated behind -DincludeIntentionalFailures=true. Assertion at IntentionalFailureExampleTest.java:27    |
